Company Overview

02

INTRODUCTION

Bhoomi Survey is a licensed surveying and development consultancy specialising in cadastral land surveys and construction surveying assignments across India.

Established in 2011 by Mr. Kiran Patel and Mr. Chirag Patel, the company supports large construction organisations, government councils, architects, builders, engineers, construction managers, property owners, developers and building designers. Its reputation has grown through accurate fieldwork, dependable delivery and the successful completion of increasingly large and complex assignments.

DISCIPLINARY**

CAPABILITY

VISION

To be the preferred surveying and survey consultancy service provider in Gujarat.

Our team strives to deliver excellent service on time and on budget.

MISSION

Deliver every project to high professional standards within the agreed time frame, while continually investing in modern technology and team development.

- Client-focused delivery
- Investment in latest technology
- Training and development of employees

People, Values & Capability

03

A company built around two core assets: the service delivered to valued clients and the people who make it possible.

Our professional team includes surveyors, draftsmen, survey technicians and office staff. Their experience across three states enables Bhoomi Survey to undertake both small and large-scale assignments.

3

STATES

01

CUSTOMER SATISFACTION

Putting client outcomes first

Respectful and inclusive teamwork

06

ENVIRONMENTAL CONSCIOUSNESS

Responsible project execution

Surveying Services

04

A practical service portfolio for land development, infrastructure, industrial and construction projects.

01

ENGINEERING SURVEY

- As-built surveys
- Route survey
- Curve setting
- Earthwork volume surveys
- Pipeline surveys
- Volume calculation
- Area calculation
- Precise positioning
- Construction setting out
- Dimensional control
- Site engineering survey

02

TOPOGRAPHIC SURVEY

- Island development
- Housing development
- As-built survey

03

GPS CONTROL SURVEY

- Prime control network
- Static & real-time observation
- Survey control station
- Primary Station Mark (PSM)

Technology & Equipment

05

We continue to invest in modern survey technology to provide accurate data within tight tolerances.

Sokkia Total Station and DGPS systems support confident field data capture. CAD software and Auto Plotter 8.0 support data processing and project deliverables.

TOTAL STATION

Sokkia 65RX

High-precision field measurement and construction setting-out.

DGPS

Sokkia GSX 2

Satellite positioning for control, mapping and survey observations.

DGPS 2

Sokkia GCX 2

GNSS capability supporting accurate positioning and control work.

SOFTWARE & DATA

CAD software

Auto Plotter 8.0

Quality databases

WORK PROCESS

A clear sequence from assessment through evaluation.

01

ASSESSMENT

Understand scope, site conditions and project requirements.

02

DECISION & OUTCOME

Define the intended result and the most suitable survey approach.

03

PLANNING

Prepare resources, methods, controls and a written fee proposal.

04

INTERVENTION

Execute fieldwork and associated survey activities efficiently.

05

EVALUATION

Review outcomes and deliver reliable project information.

For projects of every size, Bhoomi Survey prepares written fee proposals and delivers a prompt, efficient and reliable service.
